

# ENVIRONMENTAL POLICY

BETASOAP Sp. z o.o. is a major soap manufacturer on the domestic and European markets. We operate based on the principle of sustainable development, which assumes conscious and dependent relations between economic development, care for the environment and human health.

Our environmental policy is guided by a concern for the welfare of customers and the environment. The most important messages and determinants of our company's activities are: product quality, reliability of services provided, environmental protection, social responsibility for our environment, and the good of the customer.

The aim of our *Environmental Policy* is to continuously improve processes in order to minimise BETASOAP's impact on the environment, as well as: to ensure that legal and other environmental requirements are met in the Company's area of operations and to continuously raise environmental awareness among employees, business partners and the local community.

The above commitments are fulfilled by identifying environmental aspects and minimising their negative impact on the environment.

## **We implement our company's environmental policy by:**

- Complying with and meeting the requirements of Polish legislation and European standards on environmental protection;
  - Providing products that do not have an excessive impact on the environment and are safe during use;
  - Popularising knowledge of environmental activities among suppliers and customers, as well as raising their awareness and shaping attitudes;
  - Striving to source raw materials and packaging in a sustainable manner;
  - Rational management of raw materials, materials, water, electricity and heat;
  - Minimising the production of technological waste and conducting an environmentally safe waste management by optimising the production process, as well as segregating, storing and transferring waste for processing or disposal;
  - Launching products in packaging that is recyclable and recoverable;
  - Making every effort to prevent emergencies that may have a negative impact on the environment;
-

- 
- When launching investment or modernisation tasks, the use of new available technologies, taking into account the economic and environmental approach;
  - Successive improvement of occupational safety and health protection of employees in BETASOAP through continuous monitoring of environmental aspects;
  - Raising the level of environmental awareness of the management and employees by providing training, as well as promoting environmentally friendly practices and behaviours and encouraging employees to support the *Environmental Policy* and developing a sense of responsibility for its implementation;
  - Continuous improvement in the application of the environmental policy

The Company's Management Board declares to comply with the obligations contained in the *Environmental Policy* and provides the necessary financial, technical and organisational resources to implement its provisions.

This *Environmental Policy* is communicated to all employees and published and available to all interested parties.
